NANOTOUCH PROCELL WIPES

Surface Cleaning & Disinfection Wipes

For Incubators and Sterile Workstations

Application Area:

IVF incubators, sterile work cabinets, and clean workbenches.

Description:

IVF laboratories are facilities where highly sensitive procedures, such as embryo culture and gamete manipulation, are carried out. Our specially formulated QAC (Quaternary Ammonium Compounds)-based disinfectant wipes are designed to help clean critical surfaces quickly and effectively.

Formulation:

QAC

Features:

- Ready-to-Use Wipe Format
- Rapid Application and Efficient Surface Coverage
- Low-Residue Formulation
- Alcohol-Free Formula
- VOC-free and odorless
- Designed for Use in IVF Laboratories and Cleanroom Environments
- Suitable for Incubator Exteriors, Workbenches, Equipment Surfaces and High-Touch Areas
